

Navigating Data Licenses and Building a Research Plan to Access RDC Data

Andrew S. Hanks, PhD
The Ohio State University

What are barriers for researchers?

- *Where* to find the appropriate data
- *Which* data are linkable
- *Accessing* the data
- *How* to link the data

On the Agenda...

Objective: Provide information to reduce access barriers

Primary access barrier – data licenses

My foray into the world of licenses

Steps for obtaining a license

Navigating the “ultimate” license --
FSRDC

Primary Access Barrier – Data License

- Many researchers use publicly available data (see [ERS Data Table](#), [ICPSR](#), [IPUMS](#))
- Excellent restricted access data available
 - Proprietary – owned by organization or company
 - Restricted versions of public access data (FoodAPS, CES, CPS, etc...)
 - Administrative data – usually government agency data

Restricted (non-public) data require a license...

Before Entering the World of Data Licenses

- First ask
 - “Do I need restricted access data for my work?”
- “No” --  Use the public data
- “Yes” – begin the process

It all began when...

Market outcomes
for interdisciplinary
researchers

Data?

A3. What was the primary field of study for your research doctoral degree?
Do not use acronyms or abbreviations.

Field Name

A4. Was your dissertation research (or performance, project report, or music or literary composition) interdisciplinary?

☐ Yes

☐ No → GO TO A6

→ A5. (If Yes to interdisciplinary research) Please list the fields of study for your dissertation research.

Primary Field:
Field Name

Field 2:
Field Name

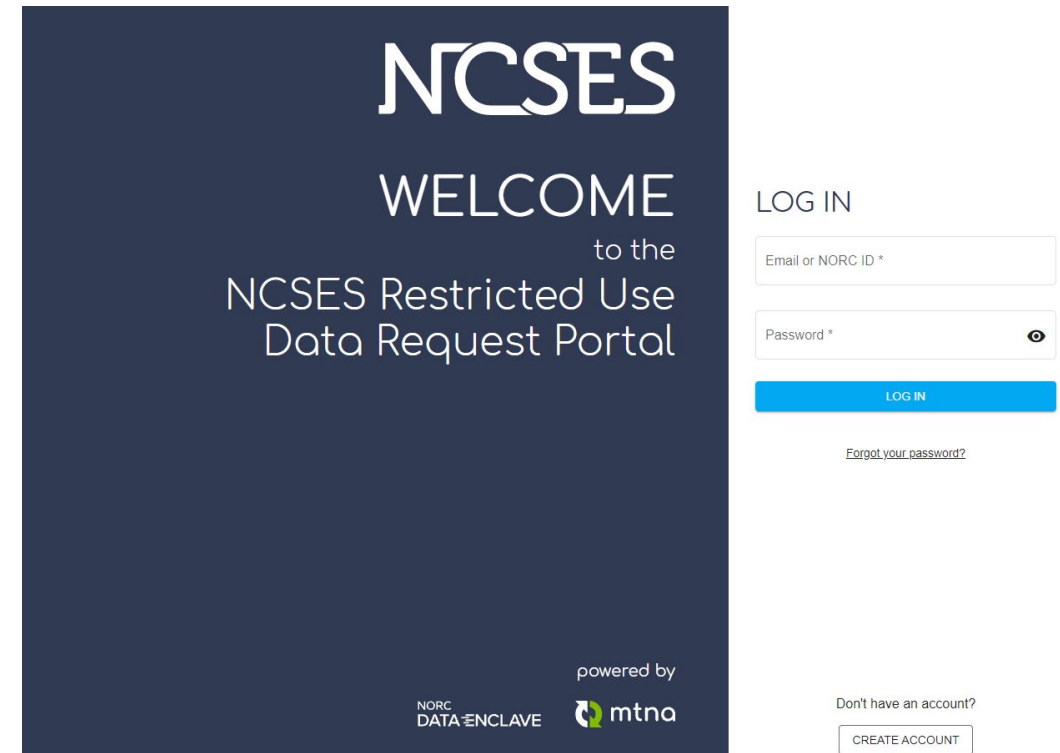

Field 3:
Field Name

B15. What will be your basic annual salary for this principal job?
If you are not salaried, please estimate your earned income. Do not include bonuses or additional compensation for summertime teaching or research.
Please enter a whole number without any commas, decimals or special characters.

Annual Salary/Earned Income:

Application Process

- Complete application for restricted use data
 - Access website (not available in 2012)
 - Project proposal – data, variables, RQs, analytical plan
 - Sign NDA and other forms (need notarized form) – includes disclosure review
 - Need university rep signature

The screenshot shows the login interface for the NCSES Restricted Use Data Request Portal. The main banner is dark blue with white text that reads "NCSES WELCOME to the NCSES Restricted Use Data Request Portal". At the bottom of the banner, it says "powered by" followed by the logos for "NORC DATA ENCLAVE" and "mtna". To the right of the banner is a white login form. It has a "LOG IN" heading, a text input field for "Email or NORC ID *", a password input field for "Password *" with an eye icon for toggling visibility, and a blue "LOG IN" button. Below the button is a link for "Forgot your password?". At the bottom right, there is a link for "Don't have an account?" and a "CREATE ACCOUNT" button.

Institution:--[Insert Name]¶¶

Principal Researcher:--[Insert Last Name of Principal Researcher]¶¶

▪ Attachment #1: Data Requirements¶¶

Date:--[please use MM/DD/YYYY format]¶¶

The following files are available for licensing from the National Center for Science and Engineering Statistics (NCSES). Please select the restricted use data files that you would like to license:¶¶

▪ Doctorate Records Files¶¶

Each year, the data from the Survey of Earned Doctorates (SED) are compiled into the Doctorate Records File (DRF). The DRF is a historical record of doctorate-degree graduates. Begun in 1920, the DRF contains annual information used to track the number of graduates in various files and other information related to the U.S. doctorate-earning population.¶¶

☐ ...DRF (through 2020)¶¶

▪ Early Career Doctorate Survey¶¶

The Early Career Doctorates Survey (ECDS) gathers in-depth information about individuals who earned their first doctoral degree (PhD, MD, or equivalent) in the past 10 years and work at academic institutions and federally-funded research and development centers. Unique in scope, the ECDS includes professional and research doctorate holders from all fields trained in the United States and abroad. Sponsored by NCSES and by the National Institutes of Health, the ECDS provides new data on the demographics, work experiences, and career paths of individuals in the first years following the completion of their doctoral studies. Data for the ECDS survey is available for the 2013 pilot study and the 2017 full survey.¶¶

☐ ...ECDS¶¶

LICENSE FOR RESTRICTED-USE DATA

Survey files requested:

WHEREAS, the **National Center for Science and Engineering Statistics** (NCSES) of the National Science Foundation (NSF) has collected individually identifiable information in the above named survey(s), the confidentiality of which is protected by the Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA), 44 U.S.C. 3501 et. sec.; section 14(i) of the National Science Foundation Act of 1950, as amended, 42 U.S.C. 1873(i); and/or the Privacy Act of 1974 as amended, 5 U.S.C. 552a; and

WHEREAS, NCSES wishes to make the data available for use by qualified and capable researchers collaborating with NCSES and/or other divisions of the NSF exclusively for statistical purposes so long as the data are appropriately used and protected in accordance with the terms and conditions stated in this License and all prevailing laws and regulations;

NSF/NCSES AFFIDAVIT OF NONDISCLOSURE

I, [REDACTED], do solemnly swear (or affirm) that I have read and understand the content of the NSF/NCSES LICENSE FOR RESTRICTED-USE DATA are protected under the Confidential Information Protection and Statistical Efficiency Act of 2002, 44 U.S.C. 3501 et. sec.; section 14(i) of the National Science Foundation Act of 1950, as amended, 42 U.S.C. 1873(i); and/or the Privacy Act of 1974 as amended, 5 U.S.C. 552a and when given access to the restricted use data (hereinafter referred to as the subject file) from the Survey of Doctorate Recipients, the Survey of Earned Doctorates, the National Survey of Recent College Graduates and/or the SESTAT Integrated Database:

- I will not use the data in the subject file for any purpose other than statistical reporting and analysis. Information from the file will be released only in statistical summaries that do not disclose information about any individual.
- I will not release the subject file or any part of it to any other person or organization.
- I will not use the subject file to attempt to learn the identity of, or to gain information concerning, any person included in the data set; unless such identification is directly related to survey administrative tasks or quality control, arising from a comparison with NIH administrative data.

If the identity of any individual in the file should be discovered inadvertently, then a) I will make no use of this knowledge, (b) I will advise the Director, NCSES, of the incident, (c) the information about the

Accessing the Data

- Several encryption layers to access NORC server
- Once in the sever, access data, variety of statistical packages, and other software
- Disclosure process to get results

NSF Secure Data Access Facility

The National Science Foundation awarded a contract to NORC to create a Secure Data Access Facility (SDAF) to house the Survey of Earned Doctorates (SED) and Survey of Doctorate Recipients (SDR) data and metadata and provide secure remote access and technical support to authorized researchers at the direction of the National Science Foundation (NSF) and Division of Science Resources Statistics (SRS). The SED began in 1957–58 to collect data continuously on the number and characteristics of individuals receiving research doctoral degrees from all accredited U.S. institutions. The results of this annual survey are used to assess characteristics and trends in doctorate education and degrees. This information is vital for educational and labor force planners within the federal government and in academia.

- Agreement

- University a

- Receive data or get access to remote server (NORC, RDC)

- For the RDC, you need to travel to the actual site

s Agreement

Unpacking the Process Continued

- Disclosure process – getting results
 - Write draft first OR disclose results first
 - Remember, NDAs protect privacy
- Maintaining the license
- CITE DATA, provide disclaimer, report final outputs

Active Agreements I Hold/Am On

Access Complexity	Agency	Data	Remote Access	Local Access (hard drive)	\$\$\$
	RDC	SED/LEHD/UMETRICS	x		Maybe
	NSF	SED, SDR, ISDR	x		
	IRIS	UMETRICS	x		Maybe
	Kilts Center for Marketing	Nielsen Consumer Panel		x	x
	OH WIC Agency	OH WIC Admin Data		x	
	OSU Center for Human Resource Research	Ohio Food Bank Data		x	
	Rural Action	Chester Hill Produce Auction Data		x	

Interest in Agencies...

Which Agencies' Administrative Data would Survey Respondents Like to Learn I

USDA Data

Interest in Data

Federal Statistical Research Data Centers (FSRDC)

- Why access RDCs?
 - Lots of donuts
 - Link admin data, such as employment records (LEHD), to survey data
 - Large samples
 - Detailed individual-level information
- Considerations
 - Time – must go to RDC
 - Locations

<https://www.census.gov/about/adrm/fsrdc.html>

Which Data Are Available Through an RDC?

- https://www.census.gov/about/adrm/fsrdc/about/available_data.html

Considerations to Gain Access to RDC

<https://www.census.gov/about/adrm/fsrdc/apply-for-access.html>

Project must:

- Provide benefits to Census Bureau programs – give examples
- Demonstrate scientific merit
- Require non-public data
- Be feasible given the data
- Pose no risk of disclosure

Process to Gain Access to RDC Data (the Census approach)

Research Proposal

- Contact RDC administrator to discuss project
- Proposal
 - Project description
- Predominant Purpose Statement
- If interested in Census data, Benefit to Census statement
- How long does it take?
 - From beginning to end 6-8 months (timing is variable)

What I Learned

Research Proposal

- Need enough detail in your methods, description, and analytical plan
 - Feasibility
 - Need non-public data
 - Confidentiality protection
 - Can add collaborators later

Benefit to Census

- My project – PSEO
- Health and food
 - Census snapshots
 - Utility of Census data for analyzing food assistance programs – develop new tool, new chart, etc.

What I Learned

Once the proposal is accepted

- More documents
- Training
- Complete as quickly as possible

Once you get SSS

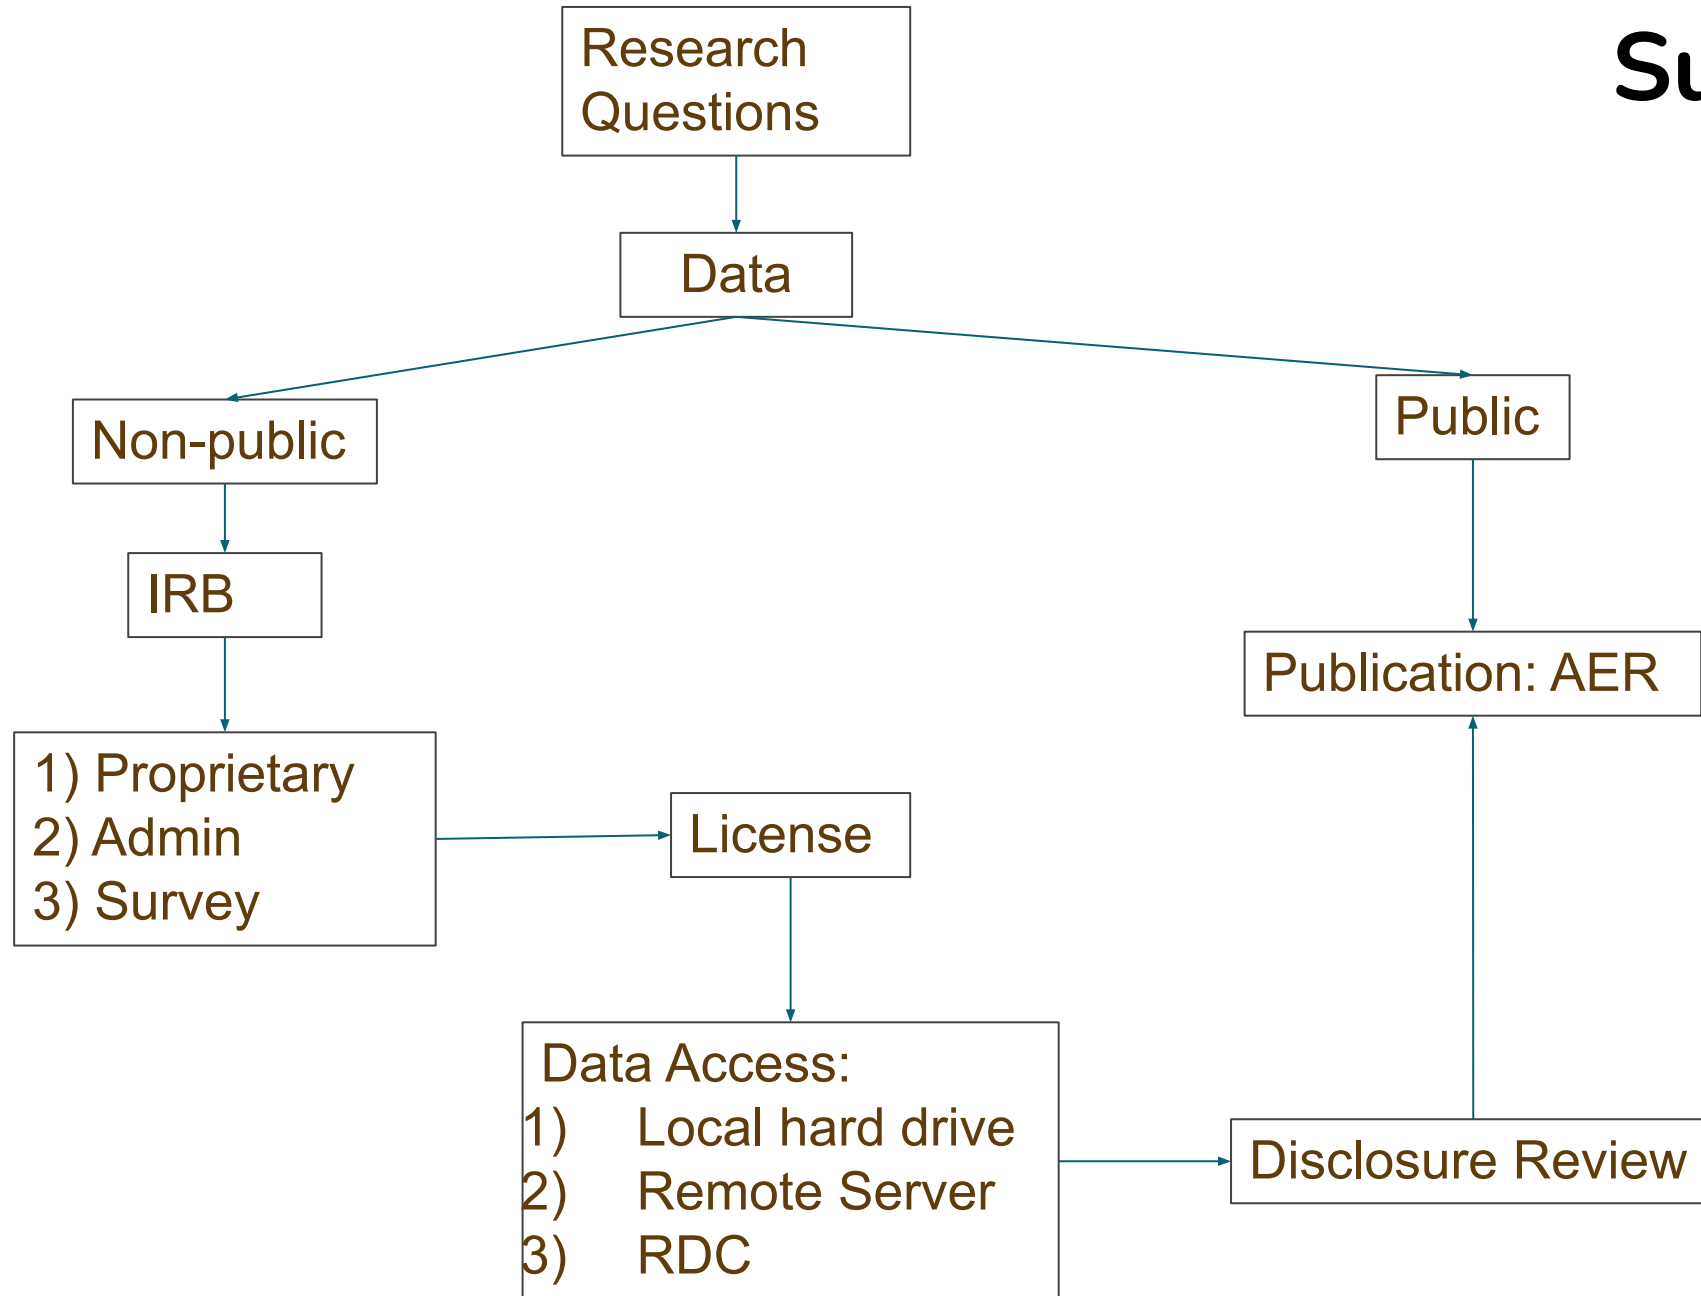

- Access site (may need to pay access fee)
- Learn “ropes” of accessing remote server from the RDC
- Disclosure process – pretty big upfront time costs
 - Two layers – RDC administrator, Non-Disclosure officer

HELPFUL TIPS

- Plan ahead – time is proportionate to complexity
- Don't recreate the wheel
- Set reminders for license renewals
- Learn process at your university/institution

Summary

Appendices

Acronyms

- DUA – data user agreement
- NDA – non-disclosure agreement
- TPAA – third party access agreement
- NORC – National Opinion Research Center
- UMETRICS – Universities: Measuring the Impacts of Research on Innovation, Competitiveness and Science
- ADRF – Administrative Data Research Facility
- FSRDC – Federal Statistical Research Data Facility

How to Access UMETRICS, Administered by IRIS

Overview of Application Process

- A research group leader or Principal Investigator should apply for data access using the Data Access Application Form found on the IRIS website (<https://iris.isr.umich.edu/research-data/access/>)
- Review of an application is typically completed within two weeks once all materials are received. If approved, all research group members will be asked to:
 1. Sign the IRIS Data Use Agreement
 2. Pay the administrative seat fee (applicable only for researchers not affiliated with an IRIS member university)
 3. Complete brief online data security training
 4. As part of the training, sign the IRIS Virtual Data Enclave Acceptable Use Policy
 - <https://iris.isr.umich.edu/research-data/access/>

Is access to the IRIS UMETRICS research data release available for non-research purposes such as program evaluation?

Yes. To apply for access to the IRIS UMETRICS data for purposes other than research, please submit the following materials to nbirk@umich.edu:

- 1. A statement of the purpose for which access to data is required, including plans to post findings on websites or social media and publication (generally no more than 1 page)**
- 2. Signature on the IRIS Restricted Data Use Agreement by user and an institutional official**
- 3. An IRB determination letter from the IRIS member institution's Institutional Review Board**
- 4. Completion of the IRIS VDE Acceptable Use Policy**
- 5. Completion of IRIS VDE training**
- 6. When the application for access to IRIS data for**

How to Obtain a Restricted-Use Data License from NCSES

- 1. Navigate to the NCSES restricted-use data access online portal:**
<https://nsfportal.norc.org/de-management-portal/account/login>.
- 2. Create an account and submit a project application. The application should include data requirements, a research plan, and a list of the specific restricted data-use variables required. The data requirements and research plan form is available here: [Data Requirements and Research Plan \(DOCX 37KB\)](#).**
- 3. Once the research plan and data requirements from the project application have been approved, applicants can download and complete the full license application from the online portal. For a license application to be considered complete, the researcher must (1) fill out the appropriate application forms, (2) obtain signatures from a senior official at the university who has the authority to enter the institution into a legal agreement with NSF and a system security officer who can attest to the security of the institution's systems, (3) complete the NCSES security training, and (4) execute affidavits of nondisclosure.**
- 4. Once the license application is completed, applicants should submit it via the online portal. After approval, NCSES will provide instructions on accessing the restricted-use data through our Secure Data Access**

How to Obtain Access to IRI Data

- Access to proprietary IRI data is limited to researchers collaborating on USDA-sponsored projects. USDA-sponsored projects include USDA grants, USDA cooperative agreements, and/or direct collaboration with USDA researchers on an issue of interest to the Department of Agriculture. For a sponsored research project, the institution affiliated with the research collaborator must enter into a Third Party Agreement (TPA) with the data provider. The language of the TPA is specified by the Vendor and must be signed as is.
- Steps to obtain a TPA:
 - 1. The ERS point of contact works with collaborators to complete the USDA TPA Input Sheet. The form is returned to the ERS Data Steward to review and forward the form to IRI.
 - 2. IRI will populate the actual TPA based on the information provided in the Input Sheet and send the populated TPA in pdf form to ERS for signatures.
 - 3. A senior official needs to sign the TPA for the institution. The confidentiality clause holds the collaborator/institution responsible for the use of the licensed materials by any third party that they share the data with. ERS and collaborators shall maintain a record of each recipient requiring access to the data.
- <https://www.ers.usda.gov/topics/food-markets-prices/food-prices-expenditures-costs/using-scanner-data/>

How to Obtain Access FSRDC

Overview

- The Census Bureau considers proposals from qualified researchers in social science disciplines consistent with the subject matter of the surveys and censuses collected by the Census Bureau. Proposals may be submitted at any time. All researcher access to restricted-use data occurs at secure Federal Statistical Research Data Centers (FSRDC).
- 1. Proposed projects must provide benefits to Census Bureau programs
- 2. Demonstrate scientific merit
- 3. Require non-public data
- 4. Be feasible given the data
- 5. Pose no risk of disclosure
- Selected restricted-access data from the Agency for Healthcare Research and Quality (AHRQ), Bureau of Economic Analysis (BEA), Bureau of Labor Statistics (BLS), and the National Center for Health Statistics (NCHS) can also currently be accessed in the FSRDCs. Proposals to use those data must meet the requirements of those agencies.

Developing and Submitting a Research Proposal

- Before preparing your research proposal, consult
- 1. RDC administrator at the location where you want to base your project regarding access fees and the content and form of a proposal
- 2. Research Proposal Guidelines
- 3. Proposal Registration Form
- 4. RDC Predominant Purpose Statement Template
- 5. Writing Benefit Statements For Projects Accessing Confidential Data
- 6. The IRS Criteria Document
- <https://www.census.gov/programs-surveys/ces/data/restricted-use-data/apply-for-access.html>
